ALL ABOUT AFTER HOURS

SLP Roles for Treating Adults With Concussions: Expanding the Toolbox ASHA Webinar

Adults with post-concussive syndrome often struggle with challenges in work, family, and quality of life. This webinar will briefly cover concussion assessment and then focus mostly on evidence-based intervention for adults. It will consider a breadth of clients, including those with sports injuries and blast injuries as well as those with falls and accidents. More information can be found on asha.org

*There is maximum seating available, so reserve today at www.shahv.org
